Dear Parent:

Your child is currently enrolled in "The Outdoor Education Experience", a senior level Physical Education elective. This course is designed to introduce your student to a variety of outdoor related physical activities. A major point of emphasis is the safe and appropriate usage of our local natural resources.

As much of the curriculum focuses on local resources, numerous lessons will occur off the property of the South Middleton School District. As such, **it is imperative that group leaders have accurate, thorough and comprehensive health information for each and every student involved in the course.** This information will accompany the class each and every time they leave the school district property.

In the event of an emergency this information could become a critical component of one's medical care. Please complete the enclosed form as thoroughly and as carefully as possible. Should you have any concerns, or questions please contact your child's physician for clarification and/or direction.

Your child's well-being is our primary concern. Thank you for your detailed attention to this important component of safe and appropriate enjoyment of the outdoors.

Sincerely,

Barbara J. Ferrell
